

myServices eCC Profile Management

Users will be prompted to complete their Traveler Profile when first accessing the myServices eCC application.

Email, First and Last Name and other Employment Information will be pre-populated from the myServices user account

The other required fields will have to be manually entered

Once a user creates a traveler profile, it will be auto-populated in new eCC requests so users will not have to re-enter the same information with every eCC request.

Emergency Contact, Passport, and Training Information will be maintained in the Traveler Profile instead of requiring users to add to every eCC.
