Exercise #2: My Profile

Objectives:
- Navigate to my profile
- Add your email address
- Change your password
- Change your signature PIN
- Add Personal Account Codes

Instructions: Execute the following steps:

You have just received access to C.Request. The first time you log into the system you will need to update some fields on My Profile. Navigate to My Profile – add your email address, change your default password and default signature PIN and add Personal Account Codes.

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
</table>
| 1    | From the **Home** screen:  
 | > Click the **My Profile** menu option on the **Standard Menu Bar** |
| 2    | The **Verify User** screen appears.  
 | > Enter your **login password**  
<p>| &gt; Click <strong>Continue</strong> |</p>

**Under the Administration view tab:**
- Verify Information entered is correct
- Click the Addresses view tab

**Notes:**
- In production, you will verify the information in these fields is correct. These fields are populated by the information provided by you when you signed up for access to C.Request.
- In the preferences section, a general requisitioner will only check the box for action items. Once checked, C.Suite will send you emails when actions either need to be taken or have been taken (i.e. to whom it was sent to for approval, final approval, rejected or accepted by CFS, etc.)
- A reviewing or approving official will want to check the box to receive and email when items are sent to their inbox.
- There is also a section that allows you to customize the way C.Request displays on screen.

| 5    | Under the *Logins/Passwords* view tab:  
  ➢ Check the box **Change Logon Password**  
  ➢ Check the box **Change Signature Password**  
  ➢ Enter & Confirm the **New Password**  
  ➢ Enter & Confirm the **New Signature PIN**  
  ➢ Click **Apply** |

**Notes:**  
✓ *In production the FPDS-NG Username field will be filled in with your email.*  
✓ *Clicking Apply saves the information and keeps you on the same screen.*  
✓ *Clicking Save saves the information and closes the screen.*

| 6    | Once you have clicked **Apply**, you will see the following option in the menu at the left.

<td></td>
</tr>
<tr>
<td>✓ For any fields that end in zero, you can hold down on the zero on your keyboard; C.Request knows when to stop</td>
<td></td>
</tr>
<tr>
<td>✓ You can also leave some fields blank (like object class) so that you have a default template ACCS. This is useful if you often use ACCS codes that have most of the same information, but may have different Object Class entries.</td>
<td></td>
</tr>
<tr>
<td>✓ AGO Fee for Service (FFS) now means your ACCS must have either 2517 or 2535 at the end of your object class code</td>
<td></td>
</tr>
<tr>
<td>✓ Pro-Tech object classes will end in 2603</td>
<td></td>
</tr>
<tr>
<td>✓ NOAAlink object classes will end in 0011</td>
<td></td>
</tr>
</tbody>
</table>

9 You’ll be returned to the **Personal Account Code Management** screen, where your new ACCS will appear and you’ll see a message at the bottom stating it has been successfully added.

- Using the above steps add the following ACCS string for **Supplies Non-Simp**: `14-21-28LEF29-P00-0001-022116001-30310002000000000-26182517-000000`
- Click the **Home** link in the **Standard Menu Bar** when finished

10 The **Home** screen appears.
Exercise #3: Create a Requisition (Paper)

Objectives:
- Navigate through C.Request
- Create a Requisition
- Follow flow chart

Instructions: Execute the following steps:

Your office is close to running out of copier/fax paper. You need to create a requisition after getting a quote for 10 boxes that would contain 10 reams per box. The quote you got from Staples was $6.59 per ream for 70+ reams.

<table>

  ![CREATE Requisition](image)  
| 2    | The Requisition PIIN and Name screen appears.  
  ➢ Choose **Document Number** from the **PICKLIST**  
  ➢ Change the **Document Name** if you wish. (i.e. [date] PAPER)  
  ➢ Click **Save**  
  ![Requisition PIIN and Name](image)
### Notes:

- **The user's codes for their office will show in the first Document Number field.**
- **The document number is made up of the Bureau Code, Office Code, Fiscal Year and a system generated number.**
- **The Office Codes can be looked up here:** [Google Sheet - Office Codes](#)
- **A preparer may change the document name to something that is specific to them; however, there is approximately a 30 character limit. If the preparer does not want to change it, the system will default the name to the Document Number.**
- **If changing the Document Name you may want to add a date at the beginning of the name letting you know when this requisition was created.**
- **Any field containing an asterisk (*) is a mandatory field that needs to be entered.**

#### Step 3

The **Requisition Administration** screen appears.

</table>
| 3a   | **On the Administration view tab:**  
The following fields should be automatically populated based on information in your Profile:  
  - **Requisition Number** (system generated)  
  - **Requisition Title** (although this can still be changed here)  
  - **Requisition Date** (populates with the current system date)  
  - **Form** (Should always read Standard Req)  
  - **Requesting Office** (populated from My Profile and should be filled with your office)  
  - **Point of Contact** (populated from My Profile and should be filled with your name)  
  - **POC Phone** (populated from My Profile and should be filled with your number) |
| 4    | **On the Administration view tab you will need to:**  
  ➢ Enter the **Delivery Date** (i.e. MM/DD/YYYY)  
  ➢ Click the **Lookup** icon for the **Recommended COR** field |

**Notes:**  
- The Delivery Date should follow the PALT guidelines.  
- The Delivery Date for certain items would be when you expect it to be delivered.  
- The Delivery Date for items that have multiple option periods should reflect the end date of the last period.  
- AGO has the ability to change the delivery date should it need to change due to PALT issues.
<table>

The filter criteria fields will be blank. Either use the drop-down arrows for each field to enter your criteria or click **Search** to bring back all FCOT numbers  

![Filter Criteria](image)

Since this is a non-simplified purchase and isn’t a service we can choose the option for No FCOT Required  

- Click the **Select** icon for the code (i.e. 00000)  

Notes:  

- If you do not know who the Contracting Officer Representative (COR) is you can type in NCR in capital letters and click the refresh icon. The fields below will then populate with default system information.  
- FCOT Number is replacing FAAPs and information containing that can be found here: [https://sites.google.com/a/noaa.gov/acquisition-grants/systems/c-bot](https://sites.google.com/a/noaa.gov/acquisition-grants/systems/c-bot)
### Notes:
- Any acquisition that is $250,000 or less might be considered a simplified acquisition and will use 5 zeroes in the FCOTs number field. Do not use more than 5!
- Any acquisition over $250,000 must have a specific FCOTs number.
- Primary Technical POC is not a required field.

**Notes:**

- The *Address Tab* information is extracted from the information provided on the *Administration* screen.
- If the delivery date is different for the line compared to what was added on the *Administration* screen, make the change here.
- Each line item’s address area can be edited to have its own shipping information and delivery date(s).
- Supplemental Address Information is **mandatory** on CLINs
- The *Option Tab* should only be used when dealing with base and option years.
- Apply needs to be done here because it will save our line information and give us the ability to then add line accounting.
- If save was done instead of apply, the user would have to re-open the line in order to see the Accounting option for the line.

- If entering the code, make sure to click the Refresh Icon to make sure you have the correct person entered in the field.
- C.Request automatically creates each “receiving order” number in increments of 10.
- If you need additional people to review before the final approval you may enter them as 10, 11, 12, etc.
- If you have a reviewer prior to an approver, you will need to select Carbon Copy. That will automatically change to view only.
- A Carbon Copy can only be completed at a level after an approval one has been completed.
- All approval levels, except for the FCO level, should have the Approval and View Only checkboxes checked.

- Because there are more than three accounting codes that will need to be added to this line and because your boss has asked that it be done by cost, you may end up with what is called a rounding issue. This happens because C.Request only allows for two decimal points in the quantity but CFS requires four. However, CFS does not allow for a 0 quantity. So if the quantity broken out equals something along the lines of 0.0040 it will round to zero, but you must enter at least 0.01 in C.Request in order for it to go through in CFS.

So when you add accounting to the line the following must be there:

- Line Item Total = Total Cost (accounting)
- Total Percentage = 100%
- Total Quantity (accounting) = Quantity on Line

To make this easier to calculate and easier to enter into C.Request, we have come up with a worksheet that will help.

---

FY 2021 – Version 1.0.1
6b2 The Rounding Worksheet is done in Excel.

The colored boxes do all of the calculations for you. Notice there are two columns for quantity. The first is for the CFS side showing the four positions after the decimal point. The second column shows what C.Request does to “round” the quantity to two positions after the decimal point. If any value in the Rounded Qty column has rounded to 0.00 or the subtotal of that column is more than the line quantity, you will need to use the FIX column to fix the quantities to make sure they equal the line quantity. Any column that is white is a fillable field and will allow you to enter data.
### Step 6b21

For this exercise there are 4 accounting codes to add. Enter these accounting codes into the worksheet first:

<table>
<thead>
<tr>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>6b21</td>
</tr>
</tbody>
</table>

<table>

</tr>
</thead>
<tbody>
<tr>
<td>Total Quantity</td>
<td>30.00</td>
<td>30.01</td>
<td>-0.01</td>
<td>0.00</td>
</tr>
</tbody>
</table>

The worksheet automatically calculates the quantity and percentage to be added to C.Request. In the subtotal and total areas, you will see if there are any differences that need to be corrected.

Any changes to the quantity should be done in the FIX column and if that is the case, you will need to make sure to enter that column's quantity into C.Request.

Once you are finished, print this worksheet for easy entry into C.Request.

Exercise #13: Create a Modification Requisition – To De-Obligate Funding

Objectives:
- Navigate through C.Request
- Create a Requisition to de-obligate funding
- Copy previous requisition
- Follow flow chart

Instructions: Execute the following steps:

Notes:
- Any modifications to awards are always done with a new requisition. However, the new requisition must have the same line number(s) as the original award.
- The new requisition must have zero dollar amounts on the line. You need to enter the amount you want de-obligated in the description along with any amount that has already been paid into the Commerce Financial System (CFS) along with the ACCS Strings that need to be de-obligated. Modification LI Action must be filled out correctly.
- The FMC Obligation Query in Discoverer can be used to find the de-obligation and paid amounts.

The original requisition was sent to acquisitions, awarded and obligated. Not all of the funds were used, so you will need to create a new requisition to de-obligate those funds. There are different reports to be used in figuring out what is left to de-obligate. Depending on the situation, an AGO officer may end up sending you the details of the requisition you need to create, or you can run the FMC Obligation Discoverer Workbook.

| 8    | The **Requisition Line Item Detail** screen appears.  
- Change *Modification LI Action* to *Change Award Line Item*  
- Change the *Cost* to the *zero* for the line (i.e. 0.00)  
- In the *Description* field enter the amount to be de-obligated (-209.28), Amount paid (1156.89) and ACCS code(s) the amount needs to being de-obligated from. Because you are creating a $0 requisition, this is the only place this information is captured.  
- Click *Apply*  
- Click on *Accounting* |
## Notes:

- Negative amounts are not allowed in the cost field. De-obligation and paid amounts should be entered in the description only.
- No ACCS is necessary on the requisition if cost for the line is set to $0.
- Since no ACCS is necessary for a $0 requisition, before deleting it off this requisition, copy the string(s) to add to the description line prior to deleting any ACCS strings.
