

Release Notes for Grants Online Version 4.22

Date Deployed: February 25, 2017

RFA Tab

The SF-424 R&R (Research and Related) form is now available in Grants Online for use with Application Packages. The additional data elements will be captured when downloading applications from Grants.gov and are also available for paper application data entry. No additional functionality is associated with this form in Grants Online.

The first image below shows the OMB form. The second image shows the Grants Online data entry screen for the SF-424 R&R. There is correlation between the numbers on the OMB form and the numbers on the Grants Online data entry screen. [JIRA: GOL-456]

SF-424 R&R (OMB Form)

OMB Number: 4040-0001
Expiration Date: 6/30/2016

APPLICATION FOR FEDERAL ASSISTANCE

Proposal Number:	16GAR005
Project Title:	Reproductive biology and size at maturity for Jonah crabs <i>Cancer borealis</i> in the Mid-Atlantic Bight
Applicant:	University of Maryland Eastern Shore
Review Criteria - Importance/Relevance and Applicability of Proposal to the Program Goals	
This criterion ascertains whether there is intrinsic value in the proposed work and/or relevance to NOAA, Federal, regional, state, or local activities.	
Does the proposal describe its relevance to a SK Program Priority in Section B, and how information gathered will contribute to NOAA mission to enhance the understanding of the fishery resource and contribute to the body of information on which management decisions are made? Does this study address an important problem, providing a clear definition of the problem, need, issue or research need to be addressed? Can the research question be answered using existing data? If not, is this the best method to obtain the data? Where applicable, is the participation of U.S. fishermen meaningfully incorporated into the project design? Will the project(s) yield environmentally compatible socio-economic benefits, such as increased business opportunities, recreational opportunities, or decreased safety hazards? The appropriateness of the data sharing plan: Has the proposal included a Data Information Sharing Plan including description of the types of environmental data and information created during the course of the project; the tentative date by which data will be shared; the standards to be used for data/metadata format and content; policies addressing data stewardship and preservation; procedures for providing access, sharing and security; and prior experience in publishing such.	
Review Comments	
Reviewer #1	
<ul style="list-style-type: none"> The proposal addresses Priority #2 – Fishery Data Collection: "Improve the cost effectiveness, and methods for the collection, reporting and dissemination of both fishery (commercial, non-commercial, recreational and for-hire fisheries) and fishery independent overall goal of this study is to "...improve current stock assessments by refining estimates and "Conduct studies to improve stock definitions and understanding of stock bounds. Does this study address an important problem, providing a clear definition of the problem, need, issue or research need to be addressed? Yes, Jonah crab harvest has rapidly increased in recent years. States Marine Fisheries Commission, managers have developed management measures to support these decisions. The results of this study could help to shape future management 	

figures, etc. will be retained in a database at UMES and made available on request. Metadata concerning project data collection and relevant environmental data will be deposited at a site designated by NOAA. Types and locations of data will be included in the project Final Report." This seems appropriate.

Reviewer#2

This proposal meets all the importance/relevance and applicability of the program goals. It describes how information gathered will contribute to NOAA's mission. They will be interacting with a 2015 S-K Grantee on the same scope of work. They will be making all data available meeting our data sharing plan. Primary data will be retained at the host site (UMES) and made available at request. All metadata will be deposited at a site designated by NOAA. They do add that types and locations of data will be included in the final project report. The research question cannot be answered with existing data as it has not been taking from this area. Management decisions could be made with the body of information that will explain the Jonah crab fishery.

Reviewer #3

The proposal describes the project's relevance to SK Program goals and priorities, and they seem appropriate. The project results could be helpful in developing management alternatives, although it appears that some of the information required is already being collected through other sampling programs.

The proposal clearly defines the problem to be addressed, and includes fishermen in a meaningful way to collect samples of smaller crabs than are generally caught in the fishery. It could be said that the project will yield "environmentally compatible socio-economic benefits" in that it could improve the basis for fishery management. The proposal includes a data-sharing plan, but it is more vague than described above.

Reviewer #4

Proposal will address a data poor species where a management program is currently developing. Data does not currently exist to inform management in a meaningful way. Proposal also includes methods for sampling smaller crabs.

Reports Tab

The functionality was restored under the Reports Tab that allows the user to specify parameters for the four reports (i.e., Award Tracking Report, Grant Planning for Competitive Grants, Grant Planning for Noncompetitive Grants, and Unexpended Balances Reports). [JIRA: GOL-582]
