Release Notes for Grants Online Version 4.30
Date Deployed: December 21, 2019

The Release Notes convey recent system upgrades and modifications. Click here to view the Help Desk contact information and reference other Grants Online training resources.

Global

1. The USASpending database contains the location where work associated with an award/grant is being performed, identified as the Principal Place of Performance (PPoP). Grants Online has been modified and has the option to store a PPoP that is different than the Recipient's location. The value of the PPoP is based upon user selections, initially from a series of radio buttons, and then from a series of dropdown menus. Click here for the Principal Place of Performance Guidance. [JIRA: GOL-913]

2. When the EDA Director approves an Award Action Request, a notification is only sent to the Program Officer and the Grants Specialist. [JIRA: GOL-935]

3. Currently the Program Office can send an award file to the Grants Management Division without an approved Procurement Request ("Zero Dollar PR"). This feature is being enhanced to permit the Grants Specialist to send the award file to both FALD and the Grants Officer. Although the award file can be sent to the Grants Officer, the award file cannot be signed without an approved Procurement Request.
NOTE: This functionality **is not** applicable to awards funded by EDA. [JIRA: GOL-936]
